

# BSS 200

## IMPERMEABLE PAVED-IN-PLACE SYNTHETIC TRACK SYSTEM

**Achieve optimal performance** while maximizing your value with the BSS 200 - a premier micro-encapsulated track system built for every budget and virtually every level of competition.

The BSS 200 starts with a paved-in-place base layer of high performance polyurethane and SBR rubber granules. It's then coated with our **two-component polyurethane sealer**, making the surface **impermeable**. Pigmented EPDM granules and single component polyurethane structural spray combine to form the spray-applied top layer. The environmentally friendly **BEYPUR 160 water-based structural spray** is another option that can be applied to the top layer that only Beynon Sports Surfaces offers.

Perfect for **training or competition**, the BSS 200 is guaranteed by a comprehensive five-year warranty.

- Low-maintenance
- Water can't penetrate the surface and cause damage
- Environmentally friendly BEYPUR 160 water-based structural spray
- Optimal performance while maximizing your value

**AN IMPERMEABLE TRACK SYSTEM THAT DELIVERS ALL-WEATHER PERFORMANCE**

A spray-applied top layer of EPDM granules and single component polyurethane creates an all-weather surface, free of granule migration.

A two-component seal coat is applied for an impermeable surface.

The bottom layer combines polyurethane and SBR granules to achieve optimal comfort and shock absorption.
